Model SDT Dewpoint Transmitter

The Shaw Moisture Meters Model SDT

is a compact, 2 wire, 4 - 20 mA dewpoint transmitter designed to meet the stringent demands of industrial applications.

Utilising the Ultra High Capacitance Shaw Moisture Sensor, various dewpoint ranges are available covering an overall range from -100 °C to +20 °C dewpoint (-148 °F to +68 °F). The 4 - 20 mA output is configurable in °C dewpoint, °F dewpoint, ppm(v), g/m³ and lb/MMSCF.

Incorporating advanced electronics, the Model SDT can derive its power from 7 - 28 V DC non-isolated power source and is configured to output a linear, isolated, 4 - 20 mA signal for distances up to 1,000 metres.

Weighing in at only 175 g (0.385 lb), the Model SDT is light enough to be supported by its connection direct into the pipeline or can be placed in a dedicated sample cell. The unit is fully self contained within a robust housing providing weatherproof protection to IP66/NEMA 4.

The Model SDT is supplied ready to use, with a Calibration Certificate traceable to National and International Humidity Standards, instruction manual and two metres (6.56 ft) of cable.

Model SU4 - Sample Conditioning Unit

The Model SU4 sample conditioning unit will reduce the pressure from the dryer to give a pressure and flow suitable for measurement. It combines a pressure reduction control, sensor holder and a flow meter for up to 10 litres per minute, (1 -2 litre is usual for continuous use), mounted on a stove enamelled back plate.

Moisture measurement under pressure will not give the correct answer but room pressure used in the Model SU4 will read correctly.

The Model SU4 comes with pneumatic connections with a choice of 1/8", 1/4" or 6 mm compression fittings if required for inlet and outlet.

NOTE:
The assembly is shown with 6.35 mm (1/4 inch) OD tube fittings.
The dimension across the tube fittings will vary for all other size fittings.
